SalvaSol Básico is the result of ENFOCA (Innovative photovoltaic charging stations against poverty in El Salvador) executed by micro-enterprise Rambiental and the two Salvadorian universities UCA and Don Bosco.

At the beginning SalvaSol Básico was developed at with funding of international NGOs like the Global Village Energy Partnership (GVEP) and the German agency for economic cooperation and development (GIZ).

Afterwards SalvaSol, a Salvadorian enterprise with social focus was funded. Product assembly is done with effort of people with intellectual disability (mental handicap) of Hogar La Rioja in San Salvador.

SalvaSol Básico is an inexpensive product that works using renewable resources and improves the living quality of low-income families that do not have connection to the power grid.

**Recharge a lamp, cell phone,
radio and batteries with FREE
energy of the sun.**

**SAVE UP to \$ 20.00
monthly**

"Since using SalvaSol Básico, I do not spend a penny on kerosene, candles, batteries or to charge our mobile phones."

Adrian Escobar Chavez, farmer in El Salvador.
